

# TOURY MARWANE

SOFTWARE ENGINEER

Design and develop full-stack web, software, and mobile solutions

## Contact

### Phone number

+33 777 361 036

### Email

marwanetoury@gmail.com

### Address

1579 Route de Mende

34090 Montpellier France

[linkedin.com/in/marwane-toury](https://www.linkedin.com/in/marwane-toury)

## Soft skills

Team work

Critical thinking

Curious

## Languages

### French

**English** Professional working proficiency (B2)

TOEIC score 915/990

## Interests

Competitive cardgame player  
Coach and active member of a local team

## Technical skills

React

NodeJs

Git

MongoDB

Typescript

Javascript

NestJs

PostgresSQL

## Experiences

### ● Full-stack developer - Doctreen

**Duration :** nov. 2024 to dec. 2025 - Montpellier, France

- **Designed, developed, and maintained** business web applications (features, testing, refactoring).
- **Developed** an internal testing benchmark system for **functional and AI teams**, reducing processing time **from half a day to a few minutes**.
- **Developed a client feedback system** integrated into the ticket management process, **used daily by end users**.

**Tech stack :** React - Nestjs - MongoDB - Postgres

### ● Final year internship - Doctreen

**Duration :** april to august 2024 - Montpellier, France

- **Developed** demo applications presented to **prospects during sales phases**.
- **Migrated and modernized** back-end applications to **NestJS**, improving **maintainability and performances**.

**Tech stack :** Express - Nestjs - Typescript - MongoDB

### ● Final year project - Conecsis

**Duration :** dec. 2023 to feb. 2024 - Montpellier, France

- **Designed** a demonstrator presented to **pilot clients** for the digitalization of patient data collection in clinical trials, using **cryptography**.

**Tech stack :** Rust - React - Postgres

### ● Industry project - TRF Retail

**Duration :** april to may 2023 - Montpellier, France

- **Developed an automated monitoring solution for internal servers**, reducing a manual process from **several hours to a few minutes**.
- **Extracted** journalistic data and generated dashboard-style **analytical reports**.

**Tech stack :** Node - Express - Typescript - MariaDB

## Education

- **Engineering degree in Computer Science from Polytech Montpellier** - obtained in 2024
